

Cable entry KDL/M

Specially for individual cables with plugs

Split cable entry KDL/M for individual cables with plugs

No more fiddling, screwing or complicated fitting. The KDL/M enables the introduction, sealing and strain-relief of pre-wired cables and hoses in control cabinets and terminal boxes in only a few steps.

The advantage: no need to disassemble plugs. Simply place a split grommet around the cable, close it and insert it in the KDL/M. That's all there is to it! The KDT/Z grommets are suitable for cables with a diameter of 3-16 mm. The KDT/ZN grommets are suitable for a diameter of 15-31 mm. Using double cable grommets, it is possible to lead two cables through a KDL/M. The split lock nut is included within the scope of delivery. Cable ties used directly on the grommets enable additional strain relief. The Polyamide 6 cable entry KDL/M does not contain any halogen, phosphor or cadmium and is resistant to weak acids and bases, fuels, alcohol and mineral-based lubricants.

- Easy handling
- Very good waterproof characteristics IP54
- Integrated expanded seal
- Sensitive cables or pneumatic hoses are not constricted
- Additional cable anchorage via cable ties
- Split counter nut included in scope of delivery

Split cable entry & lock nut
